→ The ARI Survey of Army Recruits (more commonly known as the New Recruits Survey [NRS]) is conducted to obtain information on the characteristics, enlistment motivations, attitudes, and knowledge of recruits at the point of their initial entry into the U.S. Army. The eleven reports in the 1984 series include user's manuals, codebooks (which focus on data file documentation, including special variables, and the use of the survey data available from respondents), and tables of survey results. ## FOREWORD

---

The ARI Surveys of Army Recruits, familiarly known as New Recruit Surveys, have become an important source of information for Army policymakers and planners. These surveys were originally designed in 1982 to answer questions concerning the demographics and enlistment motivations of new Army recruits. In addition to the ability to track changes in recruits from year to year, this series of surveys offers the Army an opportunity to gather new information in each year of the survey.

The 1982 and 1983 Surveys were directly commissioned by the Deputy Chief of Staff for Personnel. The 1984 and 1985 Surveys were sponsored by the U.S. Army Recruiting Command and were undertaken with the continuing interest of the Office of the Deputy Chief of Staff for Personnel. While the sponsorship, specific questions, and interests may change year to year, the charter for these surveys remains the same:

- Determine who is enlisting in the Army and why.
- Determine how to target recruiting resources to attract high quality recruits.
- Determine why recent recruits joined and their propensity to remain in the service.
- Determine which recruiting and advertising practices are proving the most successful and why.

In addition to addressing these specific objectives, this survey effort expands the availability of data to model Army enlistment and reenlistment processes.

## ACKNOWLEDGEMENTS

---

Westat wishes to acknowledge the support of the many people who played various important roles in database construction, the data entry, and documentation of the 1984 Winter Survey of Active Army Recruits. We especially appreciate all the assistance provided by the U.S. Army Recruiting Command. They are commended for their cooperation in problem resolution, steadfast support, and continued interest in this work.

We gratefully acknowledge that this survey effort could not have succeeded without the cooperation of personnel at the U.S. Army Reception Stations. They voluntarily administered the survey, working survey operations into their already hectic schedules for processing new recruits.

ARMY RESERVE ACCESSIONS, VOLUME 1

EXECUTIVE SUMMARY

---

Requirement:

To obtain information on the characteristics, enlistment motivations, attitudes and knowledge of recruits at the point of initial entry into the Army.

Procedures:

The Summer 1984 New Recruit Survey (NRS) is the fourth in a series of recruit surveys administered by ARI. It is an expanded version of the 1983 ARI survey incorporating new questions on pre-enlistment conditions.

Data were collected by ARI in group settings during initial recruit processing at all eight Army Reception Stations during June, July, and August of 1984. Reception Station personnel were responsible for scheduling and supervising survey administration, guided by instructions prepared by ARI. The NRS was self-administered and recruits were directed to indicate their responses on optical scanning forms.

Four forms of the NRS were administered to recruits. Forms A, B, and C were administered to Regular Army recruits, and Form D was given to National Guard and Army Reserve recruits. Regular Army recruits had an equal chance of receiving any one of the three forms.

Westat, Inc. was then contracted for database construction, documentation, and tabular analysis. The survey answer sheets were optically scanned and recorded exactly as marked. Survey data were then edited and coded. A user's manual, codebooks, tabulation volumes, and a report on the survey methodology, "lessons learned," and recommendations were produced.

## Results:

A total of 10,495 Army recruits completed the 1984 Summer NRS. Of these, based upon Army personnel records, 9,497 had no prior military service and 452 had prior service experience (the status for the remaining 546 was not ascertained). The sampling plan employed imposes some restrictions on the generalizability of survey results to the population of FY 84 Army accessions. However, overall the survey effort was successful in obtaining updated information regarding new recruits.

## Utilization:

ARI Surveys of Army Recruits provide information to Army personnel planners about the quantity and quality of recruits entering the Army. In particular, information regarding the characteristics, knowledge of enlistment options, and enlistment motivations of new recruits enables Army personnel planners to be cognizant of present enlistment trends. Awareness of these trends is vital, in turn, for preparing for future manpower requirements.

THE 1984 ARI SURVEY OF ARMY RECRUITS:  
TABULAR DESCRIPTION OF NPS ARMY RESERVE ACCESSIONS,  
VOLUME 1

INTRODUCTION

The purpose of this document and a companion volume, The 1984 Survey of Army Recruits: Tabular Description of NPS Army Reserve Accessions, Volume 2 (Research Product 86-13), is to provide an initial examination of the attitudes and characteristics of non-prior service Army recruits entering Reserve duty during the Summer of 1984. The attitudes and characteristics of the new recruits were obtained on the 1984 ARI Survey of Army Recruits, more commonly referred to as the ARI New Recruit Survey (NRS), and from Army personnel records.

This report is one of eight reports produced to document the approach and results obtained from the Summer administration of the 1984 NRS. The 1984 Summer NRS was administered during June, July, and August of 1984. There are separate user's manuals and codebooks which respectively document the survey approach and databases:

- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: User's Manual (Research Note 86-46). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Codebook for Summer 84 Active Army Survey Respondents (Research Note 86-42). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Codebook for Summer 84 USAR & ARNG Survey Respondents (Research Note 86-43). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.

Readers desiring an examination of the survey instrument development and content, survey administration procedures, and data quality assessments are referred to the user's manual. Other readers may be interested in examining the construction of recoded survey items and variables derived using data from the

Operations Reporting Master File (ORMF),<sup>1</sup> as well as obtaining access to the data files; these readers are directed to the codebooks. The data obtained from the three survey forms (A, B, and C) administered to Regular (active) Army (RA) recruits are documented in one codebook, and the data obtained from Form D, which was administered to new recruits for the U.S. Army Reserve (USAR) and the Army National Guard (ARNG), are documented in a separate report. Separate data files were set up containing information specific to the Army service components, i.e., RA, and USAR/ARNG.

Comparable reports were produced to document the Winter administration of the 1984 NRS. The 1984 Winter NRS was administered during October 1984 and February 1985. Like the 1984 Summer NRS, a user's manual and codebooks were produced describing variable selection and creation procedures, and documenting the survey databases created for the Army service components. The report titles are listed below:

- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Supplementary User's Manual for October 84/February 85 Administrations (Research Note 86-47). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Codebook for October 84/February 85 Active Army Survey Respondents (Research Note 86-44). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Codebook for October 84/February 85 USAR & ARNG Survey Respondents (Research Note 86-45). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.

<sup>1</sup>The Operations Reporting Master File (ORMF) contains Army personnel records from two sources, MEPRS and REQUEST. The acronyms MEPRS and REQUEST stand for the Military Entrance Processing Reporting System, and Recruit Quota System, respectively. The MEPRS data system contains information about DoD personnel being voluntarily processed into a branch of the Armed Forces; the system is documented in MEPCOM Regulation 18-5. REQUEST is the Army's data system used to record information about enlistees into one of the Army components (Regular Army, Army Reserve, and Army National Guard). The REQUEST system is documented in Army Regulation (AR) 601-210.

The October 84/February 85 user's manual supplements the information provided in the 1984 user's manual with specific details concerning the Winter survey administration and evaluation of the quality of the data obtained during this latter administration.

The initial survey results for other Army components surveyed during the 1984 Summer administration are reported in separate documents:

- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Tabular Description of NPS Army National Guard Accessions (Research Product 86-11). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Tabular Description of NPS (Active) Army Accessions, Volume 1 (Research Product 86-09). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Tabular Description of NPS (Active) Army Accessions, Volume 2 (Research Product 86-10). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.

Tabulation volumes were produced for the Summer administration of NRS-84 for each of the three Army service components (RA, USAR, and ARNG). No tabulation volumes were produced for the 1984 Winter NRS. However, the crossing variables and recoded survey items produced for the Summer 1984 tabulations were also constructed using the Winter NRS-84 data, thus facilitating the work of future analysts wishing to produce comparable crosstabulations.

The specific crossing variables used in the Summer tabulation volumes varies according to component. Volume 1 of the 1984 Summer NRS, USAR component, contains two-way tables of survey items by the following five crossing variables: respondent gender, highest education level, self-reported ethnic group, marital status, and AFQT<sup>2</sup> category. Volume 2 of the Summer 1984 USAR tabulations includes an additional five crossing variables: participation in split training and/or the ROTC simultaneous membership program, receipt of a cash enlistment bonus, region,

---

<sup>2</sup>A respondent's AFQT category is based on his/her Armed Forces Qualification Test (AFQT) score on the Armed Services Vocational Aptitude Battery (ASVAB). The AFQT score scale has traditionally been divided into categories for purposes of reporting recruit trainability.

rural/urban composition of preenlistment residence, and age at time of accession.

It is important to note that the variable used to determine classification of a respondent into an AFQT category for the 1984 N.S. crosstabulation volumes was not the AFQT category of record (i.e., the category recorded on the ORMF record for that respondent). Instead, the AFQT category of record was recoded to be consistent with the 1980 Youth Norms for AFQT that went into effect 1 October 1984. This recoding will facilitate the comparison of the 1984 NRS tabulations to those completed for the 1985 (and future) administrations of the survey.

Each tabulation volume contains an introduction to the 1984 NRS report series, project overview, a chapter on how to use the volume, index to the tables, and the contingency tables themselves. Technical appendixes to the volumes include the four NRS-84 instruments. One additional report of potential interest presents a comparison of the methodologies used in the 1984 and 1985 administrations of the NRS. This report is entitled: The 1984 and 1985 ARI Survey of Army Recruits: Methodology and Recommendations for Future Administrations (Technical Report 706).

#### Organization of Tabulation Volume 1 -- Summer NRS-84. USAR Component

This document provides both an overview of the 1984 NRS as well as tabular entries for the survey items by the first five of ten crossing variables. The volume is divided into four major sections: an introduction and project overview; a chapter on how to read and interpret the tabulations; tabulations of the survey responses of new USAR recruits entering reserve duty during the Summer of 1984 by the first set of five crossing variables; and four technical appendixes.

The first chapter introduces Volume 1 of the Summer 1984 NRS, USAR component, within the context of the eight-volume series of reports produced to document the Summer administration of the 1984 NRS. Reports documenting the administration procedures and database for the 1984 Winter NRS are mentioned in addition to a report comparing the methodologies employed in the 1984 and 1985 NRS. The structure and organization of the tabulation volume is described followed by a brief overview of the 1984 NRS project.

The second chapter is a guide to interpretation of the crosstables. This section of the report explains how to read the tabulation pages, provides tabulation volume conventions, discusses the exclusion of selected respondents from six survey items for presentation in the tabulations, provides guidance in

the interpretation of the chi-square statistic, and explains how to use the tabulation index.

The next major section of this document is comprised of the tabulation index and the tables themselves. Each survey item appears in five two-way tables corresponding to each of the first five crossing variables. Tables of survey items are organized according to content area. Six major areas are identified.

The report is supplemented by four technical appendixes. The appendixes contain:

- The 1984/1985 ARI Survey of Active Army Recruits - Form A (Appendix A);
- The 1984/1985 ARI Survey of Active Army Recruits - Form B (Appendix B);
- The 1984/1985 ARI Survey of Active Army Recruits - Form C (Appendix C); and
- The 1984/1985 ARI Survey of Army Reserve/National Guard Recruits - Form D (Appendix D).

#### 1984 NRS Project Overview

The ARI Surveys of Army Recruits, commonly known as the ARI New Recruit Surveys (NRS), are conducted on a regular basis to provide updated information on the characteristics, knowledge of enlistment options, and enlistment motivations of recruits at the point of their initial entry into service. Military personnel planners require such information on a regular basis to monitor current recruiting strategies and to forecast future enlistment trends.

The NRS were begun in 1982. Expanded versions of the original surveys were administered in the Summer of 1983 and Winter of 1984. Further revisions and expansions were made to the 1983 instruments for administration in the Summer of 1984 and Fall/Winter of FY 85. In addition to the ability to track changes in recruits from year to year, this series of surveys offers the Army an opportunity to gather new information in each year of the survey.

The 1982 and 1983 surveys were directly commissioned by the Deputy Chief of Staff for Personnel. The 1984 and 1985 NRS were sponsored by the U.S. Army Recruiting Command and were undertaken with the continuing interest of the Deputy Chief of Staff for Personnel. While the sponsorship, specific questions, and interests may change from year to year, the charter for these surveys remains the same. The four main research requirements have been

to determine: (1) the demographic composition of entering recruits; (2) how to target recruiting resources to attract high quality recruits; (3) new recruits' enlistment motivations and propensity for remaining in service; and (4) which recruiting and advertising practices are proving the most successful and why.

The 1984 Summer and Fall/Winter NRS are, respectively, the fourth and fifth in the series of recruit surveys conducted by ARI. Survey data were collected in group settings during initial recruit processing at all eight Army Reception Stations during June, July, and August of 1984, and again in October 1984 and February 1985. Reception Station personnel were responsible for scheduling and supervising survey administration, guided by instructions prepared by ARI. The NRS was self-administered and recruits were directed to indicate their responses on optical scanning forms.

Four forms of the NRS were administered to recruits. Forms A, B, and C were administered to Regular Army recruits, and Form D was given to National Guard and Army Reserve recruits. Regular Army recruits had an equal chance of receiving any one of the three forms.

A total of 15,309 Army recruits completed the 1984 NRS. A majority, 10,495, of these recruits were surveyed during the Summer administration, and 4,814 completed surveys during the Fall/Winter 1984 NRS. The surveys were distributed across component as follows:

<u>Summer</u>		<u>Fall/Winter</u>	
<u>RA</u>	<u>USAR/ARNG</u>	<u>RA</u>	<u>USAR/ARNG</u>
6,184	4,311	3,524	1,290

The survey answer sheets were optically scanned and recorded exactly as marked. Survey data were then edited and coded. User's manuals, codebooks, tabulation volumes, and a report comparing the 1984 and 1985 survey methodologies, "lessons learned," and recommendations were produced.

The sampling plan employed imposes some restrictions on the generalizability of survey results to the population of Army accessions during the third and fourth quarters of FY 84, and first and second quarters of FY 85. However, overall the survey effort was successful in obtaining updated information regarding new recruits.

The 1984 ARI Survey of Army Recruits provides information to Army personnel planners about the quantity and quality of recruits entering the Army. In particular, information regarding the characteristics, knowledge of enlistment options, and enlistment motivations of new recruits enables Army personnel planners to be cognizant of present enlistment trends. Awareness of these trends is vital, in turn, for preparing for future manpower requirements.

## HOW TO USE THIS VOLUME

The purpose of this chapter of the Tabular Description is to provide assistance in reading the Summer 1984 NRS tabulations for the USAR component. The first section in this chapter briefly reviews the tabulation volume composition. The next sections in this chapter provide examples of the two different types of tabulation pages and a simple interpretation of the chi-square statistic. This is followed by a brief discussion of the use of the tabulation index to locate specific tables, and finally presentation of the index itself.

### Tabulation Composition

The purpose of the tabulation volume is to provide an overview of survey results for Summer NRS-84 respondents by service component. Two-volume tabulation sets are available for new recruits entering the Regular Active Army and the Army Reserve during the summer of 1984. A separate tabulation volume was produced for new recruits entering the Army National Guard in the summer of 1984. The two-volume sets of tabular descriptions produced for the RA and USAR provide tables of survey items crossed by ten demographic and service-related characteristics. The single volume of tabular descriptions of the ARNG contains survey variables crossed by a combination of demographic and service-related characteristics.

Tables in this volume are organized into six major content areas: (1) Enlistment, (2) Advertising and Promotional Events, (3) Media Habits, (4) Recruit Background and Demographic Description, (5) Household Characteristics, and (6) Influencers. Survey items are thus presented within the appropriate subject area.

Volume 1 in the USAR Tabular Description contains tables of survey items with the following five crossing variables:

(1) respondent gender, (2) highest level of education, (3) self-reported ethnic group, (4) marital status, (5) AFQT category.

Volume 2 for the USAR contains tables of the same survey items with five additional crossing variables: (6) participation in split training and/or the ROTC simultaneous membership program, (7) receipt of a cash incentive (GMA<sup>3</sup> and GMB<sup>4</sup> responses only), (8) region (recruiting brigade), (9) rural/urban composition of preenlistment residence, and (10) age at time of accession. See

### Contents of a Tabulation Page

Tabulation pages contain descriptive information about the survey item as well as presenting the tabled data. Descriptive information includes: variable name, variable label, statement of the survey question, response category values and labels, and question location (Form and question number, e.g., A034 = Question 34 on Form A) on the 1984 NRS instruments. When the survey item has been altered from its original presentation in the instrument, the notation "recoded" precedes the statement of the survey item. Three survey items were recoded in order to reduce the number of original answer categories to make reading the crosstables easier.

In addition to the items listed above, each tabulation page also contains information to aid in the interpretation of the tables themselves. This information includes: the number of

completed surveys obtained for the non-prior service members in the component, table title (survey item by crossing variable), labels for the categories of the crossing variable, the actual number of respondents within each category of the crossing variable, value categories for the survey item, the percentage of responses within each category of the crossing variable, and Pearson's chi-square statistic with its associated degrees of freedom and probability. Serial list question sets which instructed respondents to "mark all [response categories] that apply" were reconfigured for presentation in a single, combined table. Chi-square statistics, degrees of freedom, and probabilities are presented for each line in these summary tables. An example of this type of table and further discussion are provided in the next section of this chapter.

The emphasis of NRS is on Army recruits with no prior service experience. For this reason, respondents were selected for tabular presentation only if "no prior military service" was recorded on their official Army personnel records. Note that only 10.2% of the 1984 Summer USAR/ARNG respondents had had prior military service. Thus, there are too few of these respondents to support extensive analysis.

The total number of responses may differ from table to table as well as differ in comparison with the reported number of completed surveys. This is due to item nonresponse (i.e., respondents who failed to answer the question, provided more than one answer, or wrote an uninterpretable, or out-of-range response). The number of non-prior service (excludes recruits in part 2 of split training) USAR recruits who completed surveys is reported in the upper portion of each tabulation page with the label, "Total NPS Surveyed."

### Tabulation Conventions

Each of the six major content areas contains numerous tables with relevant survey items. Survey items are included in five two-way tables corresponding to the five crossing variables in Volume 1. The tables for each survey item are typically laid out across two facing pages. The first page contains all the descriptive information about the survey item (i.e., variable name, question, value labels) plus the first two tables. The second page contains the final three tables. In instances in which the survey item has ten or more values, only one table is presented per page due to space limitations.

Several survey items that are documented in the 1984 USAR and ARNG codebook were intentionally excluded from the USAR and ARNG crosstabulation volumes. Specifically, survey items U228, U229, U230, and U231, which concern enlistment incentives, were not included. These items were excluded because responses to

these items can only be interpreted for small subsamples of the respondents. For example, U230 would have to be separately tabulated for each of three types of incentives.

Figure 1 provides an example of a table for a recoded survey item requesting a single response. The numeric indicators on Figure 1 are identified and their referents described on subsequent pages.

Figure 2 presents an example of a table combining the response categories for a serial list question set. A special table format was devised and variables in the series were reconfigured for inclusion in the table. Essentially the same information is provided for serial list question sets as is available for the more typical, single response items. Tables for serial list question sets, because they combine a series of variables, contain multiple chi-square statistics. Aside from this difference, the two table formats contain the same types of descriptive information and tabular data.

Serial list question sets pose an overall question such as, "Which of the following mathematics and technical courses, if any, did you take and pass in high school?", and then request the respondent to evaluate (by checking the item to indicate "yes" and leaving the item unchecked to indicate "no") each response category in the series. Each response category is used to construct a dichotomous variable indicating whether or not the respondent checked the item. In the previous example, a respondent might have checked the subjects, Physics, Calculus, and Trigonometry, and have left Computer Science and Business Math unchecked. Variables would have been constructed for each of the five subjects; the value "1" would be used to indicate which subjects were reported to have been taken and passed; the value "0" would be assigned when the subject was not selected.

## EXPLANATION OF FIGURE 1

### CONTENTS OF A TABULATION PAGE FOR A RECODED SURVEY ITEM

- 1 Page number.
- 2 Variable name for tabled survey item.
- 3 Variable label.
- 4 Notation indicating that the survey item has been altered from its original format. Changes are due to regrouping of response alternatives.
- 5 Statement (or reworded statement) of survey item as it appears in the questionnaire. See Appendixes for exact wording and context.
- 6 Actual/recoded values of tabled survey item.
- 7 Value labels for tabled survey item.
- 8 Question location on each form of the 1984 NRS. The letter of the survey form appears first followed by the question numbers. When the question was not included on a specific survey form, the space for that survey form (A-D) is left blank. In some instances, all spaces for question location will contain the letter "A" followed by three numbers. This convention is used when the question appears in the background section of all the survey instruments and has no specific question number. The "A" designates the item's inclusion in the background section of the instruments; the number is an indication of the approximate order of presentation.
- 9 Total number of completed surveys that were received from non-prior service USAR recruits. This number is an unweighted count based on the survey sample. In this example, it indicates that 1,654 non-prior service (non-split 2) USAR respondents completed surveys containing the survey item.
- 10 Table title (survey item by crossing variable label).
- 11 Value labels for crossing variable. In this example, the labels describe the categories of gender which can only be male and female. Each of the crossing variables have unique value labels which will remain the same across survey item/table presentation.
- 12 Frequency counts of responses to survey item broken down by category of the crossing variable. These may be referred to as 'marginal N's' since they provide an overall count or number of responses within each category of the crossing variable.
- 13 Total number of valid responses. This is a marginal N of total responses to this survey item across crossing variable categories. In contrast to item 9 (N of NRS completed surveys), this N will necessarily vary across tables due to missing values on particular survey items and on the crossing variables; however, this number will always be less than or equal to the number reported in item 9.
- 14 Survey item values. Only item values are presented in the actual tables to preserve clarity; however, these values are described (labeled) at the top of the tabulation page (see item 6).
- 15 Sample percentages broken down within crossing variable categories.
- 16 Sample percentages of responses across crossing variable categories. These percentages are presented for each survey item category.
- 17 Total column percents. These column percentages will equal 100% in all tables, since the percentages of sample responses within each crossing category must account for the total responses within that crossing category.
- 18 Value of the chi-square statistic.
- 19 Degrees of freedom (D.F.) associated with the chi-square statistic.
- 20 Probability based on the chi-square distribution (see the final section in this chapter for a discussion on interpretation of the chi-square statistic).

⑬ Percentage of Respondents  
Checking Response Category

Figure 2. Example of a tabulation page  
for a serial list question set.

An attempt was made to combine all serial response categories into a single table for ease of substantive interpretation of the overall question. This required the development of a special table format. The percentage of individuals checking each response category was input to a summary table as presented in the tabulations. Each row in the summary table contains a different variable corresponding to one of the response categories in the serial list question set. Each summary table, then, consists of a series of related variables tabled with a crossing variable. Using the example in Figure 2, the summary table for T198 actually represents ten 2x2 tables. Row A represents the 2x2 table:

T198 by Gender

	N=	Male 1,289	Female 318	Total 1,654
Checked A		64.0	78.6	66.9
Did Not Check A		36.0	21.4	33.1
	Chi-Square Approx.	24.6	DF 1	Probability 0.0000

Each row in the summary table for T198 represents a table which includes both the percentage of individuals checking the response category as well as the percentage of respondents who answered the question but did not check the particular response category. For conciseness, only the percentage of individuals checking a particular category was presented in the summary table.

Interpretation of Row A in the summary table shown in Figure 2 is as follows:

- 64.0% of all male respondents to T198 reported having taken and passed elementary algebra in high school; 36.0% of the males did not report taking and passing elementary algebra in high school. Similarly, 78.6% of female respondents reported taking and passing elementary algebra, 21.4% did not report taking and passing this course in high school. The population percentages of all responses to T198 categorized 66.9% of new recruits as having taken and passed elementary algebra in high school and 33.1% as not having had the class.

- The chi-square statistic associated with Row A in the summary table is testing the relationship between gender and taking and passing elementary algebra in high school. The chi-square value at 24.6, with 1 degree of freedom, yields the probability 0.0000. This is considered to be a highly significant statistical difference. (See the next section in this chapter for a discussion of the interpretation of the chi-square statistic.)

As in the example above, the other rows in the summary table for T198 may also be interpreted as if the percentages of individuals not checking the response categories were presented. The chi-square statistics were calculated using this complete information.

### Interpreting Pearson's Chi-Square Statistic

A Pearson's chi-square statistic is reported for each table in this tabulation volume. The chi-square is a measure of the relationship between the survey item and crossing variable. In addition to reporting this statistic, each table also presents the associated degrees of freedom (D.F.) and the probability (abbreviated as "PROB.") that a significant relationship exists between the survey item and crossing variable.

As a guide to readers of this volume, it is suggested (following accepted social science conventions) that only tables with chi-square probabilities of .01 or less (e.g., .0090, .0050, .0001, .0000, etc.) be interpreted as statistically significant. That is, if a table crossing AFQT category with education level has a chi-square probability of .0098, the reader may conclude that there is a statistically significant relation between education and AFQT. Any table having a probability greater than .01 (e.g., .0600, .1000, .2500, .8999, etc.) should not be interpreted as significant.

The chi-square statistic, then, indicates which variables are statistically related. This statistic does not, however, inform the reader about the form of the relation. In the example above, a relationship was said to exist between AFQT category and education level. Based solely upon the chi-square statistic, we cannot say whether individuals in the higher AFQT categories are relatively more educated than those in the middle or lower categories or vice versa: it only implies that there is a reliable difference between the groups; it does not imply that each group differs from every other group. To determine the form of the relationship between the variables, additional statistical tests are required.

## Use of the Tabulation Index

The tabulation index on the following pages provides a table of contents for the tabulations. The index provides three pieces of information for each survey item: variable name for the survey item, variable label, and page number. The index listing for each survey item is presented in the sequence of their presentation in the tabulations. The index lists all survey items within each of the six major content areas. The index should be used as one would use a table of contents to locate crosstables for particular survey items.

**APPENDIX A**

**THE 1984/1985 ARI SURVEY  
OF ACTIVE ARMY RECRUITS**

**(FORM A)**

## APPENDIX A

FORM A

### 1984/1985 ARI SURVEY OF ACTIVE ARMY RECRUITS

The Army Research Institute (ARI) is conducting a survey of people entering the Army. You have been selected to participate in this important survey. Your answers will have no effect on you as an individual. Please read and follow all directions carefully.

#### NOTE:

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information that is collected.

The Department of the Army may collect the information requested in the ARI Survey of New Army Recruits under the authority of 10 United States Code 139.

Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in the survey will be used to evaluate and improve military personnel and recruiting policies. The information will be used for research and analysis purposes only.

#### HOW TO FILL OUT THIS SURVEY

- A. Read each question carefully.
- B. Put all of your answers on the ARI GENERAL PURPOSE ANSWER SHEET.  
DO NOT PUT ANY MARKS IN THIS QUESTION BOOKLET.
- C. IMPORTANT DIRECTIONS FOR MARKING ANSWERS:
  1. Use only a number 2 pencil for completing this survey.
  2. DO NOT use ink or ballpoint pens.
  3. Make heavy black marks that fill the response circle completely.
  4. Erase completely any answer you wish to change.
  5. Make no stray marks on the answer sheet.
  6. Please look at the Examples of right and wrong markings on side 1 (upper left) of the ANSWER SHEET.

# SPECIAL CODES ON SIDE 1

In Boxes F and G, enter the number of weeks you were working in the past year — from 0 to 52. Darken the circles that match your entry.

In Boxes H and I, enter the number of weeks you were not working and were looking for a job in the past year — from 0 to 52. Darken the circles that match your entry.

You are now going to start answering questions in the main part of the survey. Answers for these questions are marked in the numbered rows on the Answer Sheet. Be sure to mark the letter best fitting your opinion in the correctly numbered row.

The first question is:

1. Based on what you know now, how satisfied do you think you will be with Army life? Please use the scale below to answer this question. For example, people who expect to be Very Satisfied with Army life would mark "A". People who think they will be Very Dissatisfied with the Army would mark "G". Other people may have opinions somewhere between "A" and "G".

VERY SATISFIED			VERY DISSATISFIED			
A	B	C	D	E	F	G

Mark the letter which shows how satisfied you expect you will be in Row 1 on the Answer Sheet.

This set of questions are about the time you spent in the Delayed Entry Program (DEP), that is the time after you signed your enlistment contract but before you "shipped out" to this reception station. If you shipped out the day you signed your contract, just mark "J" for each of these questions and go to the next set of questions.

39. Mark the one answer from each column that best describes what you have been doing since you signed your contract.

mark one letter from this column

- A. In school full time
- B. In school part time
- C. Not in school

mark one letter from this column

- D. Working full time
- E. Working part time
- F. Not working but looking for work
- G. Not working and not looking for work

(Consider yourself "in school" during school vacations.)

Or just mark J. Does not apply, I was not in the DEP

40. While in the DEP did you look for another job or some other way to pay for school instead of going in the Army?

(Mark only one)

- A. Yes
- B. No
- J. Does not apply, I was not in the DEP

41. How often did you have contact with your recruiter while you were in the DEP?

- A. Every day
- B. Every few days
- C. Once a week
- D. Twice a month
- E. Once a month
- F. Every couple of months
- G. Only when I signed my contract and when I was getting ready to "ship out" to the Reception Station.

J. Does not apply, I was not in the DEP.

42. Were you satisfied with this contact?

- A. I couldn't seem to get my recruiter to pay attention to me
- B. A lot less contact than I liked
- C. A little less contact than I liked
- D. About right
- E. A little more contact than I wanted
- F. Much more contact than I wanted

J. Does not apply, I was not in the DEP

The remaining questions concern factors that contribute to job satisfaction. Mark your answers on the back of the Answer Sheet. Make sure you mark your answer in the correctly numbered space. You will make four ratings for each factor as follows:

Rating 1) In the first column on the back of your answer sheet, rate each factor according to its importance to you, personally, using the following rating scale:

- A. Not important at all
- B. Somewhat important
- C. Fairly important
- D. Very important
- E. Most important; I would not take a job that did not have this

Rating 2) Rate each of the 20 factors for its potential for satisfaction by enlisting in the Army. That is, how satisfied in the Army would you expect to be on each of these factors? Use the scale listed below and place these ratings in the second column on your answer sheet.

- A. Very unsatisfied
- B. Somewhat unsatisfied
- C. Neutral
- D. Somewhat satisfied
- E. Very satisfied

Rating 3) Next, rate each of the 20 factors according to its potential for satisfaction if you did NOT enlist in the Army. Refer back to your answer to question 80 (the last question on the previous page). Consider how each of the 20 factors would be satisfied if you were going to school and/or working — whatever you said you would do if you did not enter the Army. Use the scale listed below and place these ratings in the third column of your answer sheet.

- A. Very unsatisfied
- B. Somewhat unsatisfied
- C. Neutral
- D. Somewhat satisfied
- E. Very satisfied

Rating 4) Did you consider this factor in your decision about enlisting in the Army?

- A. Yes
- B. No

**THE 1984/1985 ARI SURVEY  
OF ACTIVE ARMY RECRUITS**

**(FORM B)**

## APPENDIX B

FORM B

### 1984/1985 ARI SURVEY OF ACTIVE ARMY RECRUITS

The Army Research Institute (ARI) is conducting a survey of people entering the Army. You have been selected to participate in this important survey. Your answers will have no effect on you as an individual. Please read and follow all directions carefully.

#### NOTE:

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information that is collected.

The Department of the Army may collect the information requested in the ARI Survey of New Army Recruits under the authority of 18 United States Code 139.

Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in the survey will be used to evaluate and improve military personnel and recruiting policies. The information will be used for research and analysis purposes only.

#### HOW TO FILL OUT THIS SURVEY

- A. Read each question carefully.
- B. Put all of your answers on the ARI GENERAL PURPOSE ANSWER SHEET.  
DO NOT PUT ANY MARKS IN THIS QUESTION BOOKLET.
- C. IMPORTANT DIRECTIONS FOR MARKING ANSWERS:
  1. Use only a number 2 pencil for completing this survey.
  2. DO NOT use ink or ballpoint pens.
  3. Make heavy black marks that fill the response circle completely.
  4. Erase completely any answer you wish to change.
  5. Make no stray marks on the answer sheet.

The remaining questions concern factors that contribute to job satisfaction. Mark your answers on the back of the Answer Sheet. Make sure you mark your answer in the correctly numbered space. You will make four ratings for each factor as follows:

- Rating 1) In the first column on the back of your answer sheet, rate each factor according to its importance to you, personally, using the following rating scale:
- A. Not important at all
  - B. Somewhat important
  - C. Fairly important
  - D. Very important
  - E. Most important; I would not take a job that did not have this
- Rating 2) Rate each of the 20 factors for its potential for satisfaction by enlisting in the Army. That is, how satisfied in the Army would you expect to be on each of these factors? Use the scale listed below and place these ratings in the second column on your answer sheet.
- A. Very unsatisfied
  - B. Somewhat unsatisfied
  - C. Neutral
  - D. Somewhat satisfied
  - E. Very satisfied
- Rating 3) Next, rate each of the 20 factors according to its potential for satisfaction if you did NOT enlist in the Army. Refer back to your answer to question 80 (the last question on the previous page). Consider how each of the 20 factors would be satisfied if you were going to school and/or working — whatever you said you would do if you did not enter the Army. Use the scale listed below and place these ratings in the third column of your answer sheet.
- A. Very unsatisfied
  - B. Somewhat unsatisfied
  - C. Neutral
  - D. Somewhat satisfied
  - E. Very satisfied
- Rating 4) Did you consider this factor in your decision about enlisting in the Army?
- A. Yes
  - B. No

## APPENDIX C

### 1984/1985 ARI SURVEY OF ACTIVE ARMY RECRUITS

The Army Research Institute (ARI) is conducting a survey of people entering the Army. You have been selected to participate in this important survey. Your answers will have no effect on you as an individual. Please read and follow all directions carefully.

#### NOTE:

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information that is collected.

The Department of the Army may collect the information requested in the ARI Survey of New Army Recruits under the authority of 10 United States Code 139.

Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in the survey will be used to evaluate and improve military personnel and recruiting policies. The information will be used for research and analysis purposes only.

#### HOW TO FILL OUT THIS SURVEY

- A. Read each question carefully.
- B. Put all of your answers on the ARI GENERAL PURPOSE ANSWER SHEET.  
DO NOT PUT ANY MARKS IN THIS QUESTION BOOKLET.
- C. IMPORTANT DIRECTIONS FOR MARKING ANSWERS:
  1. Use only a number 2 pencil for completing this survey.
  2. DO NOT use ink or ballpoint pens.
  3. Make heavy black marks that fill the response circle completely.
  4. Erase completely any answer you wish to change.
  5. Make no stray marks on the answer sheet.
  6. Please look at the Examples of right and wrong markings on side 1 (upper left) of the ANSWER SHEET.

You are now going to start answering questions in the main part of the survey. Answers for these questions are marked in the numbered rows on the Answer Sheet. Be sure to mark the letter best fitting your opinion in the correctly numbered row.

The first question is:

1. Based on what you know now, how satisfied do you think you will be with Army life? Please use the scale below to answer this question. For example, people who expect to be Very Satisfied with Army life would mark "A". People who think they will be Very Dissatisfied with the Army would mark "G". Other people may have opinions somewhere between "A" and "G".

|                |           |                   |
|----------------|-----------|-------------------|
| VERY SATISFIED |           | VERY DISSATISFIED |
| A              | B C D E F | G                 |

Mark the letter which shows how satisfied you expect you will be in Row 1 on the Answer Sheet.

APPENDIX D

FORM D

1984/1985 ARI SURVEY  
OF ARMY RESERVE/NATIONAL GUARD RECRUITS

The Army Research Institute (ARI) is conducting a survey of people entering the Army. You have been selected to participate in this important survey. Your answers will have no effect on you as an individual. Please read and follow all directions carefully.

**NOTE:**

Public Law 93-573, called the Privacy Act of 1974, requires that you be informed of the purpose and uses to be made of the information that is collected.

The Department of the Army may collect the information requested in the ARI Survey of New Army Recruits under the authority of 18 United States Code 139.

Providing information in this questionnaire is voluntary. Failure to respond to any particular questions will not result in any penalty.

The information collected in the survey will be used to evaluate and improve military personnel and recruiting policies. The information will be used for research and analysis purposes only.

**HOW TO FILL OUT THIS SURVEY**

- A. Read each question carefully.
- B. Put all of your answers on the ARI GENERAL PURPOSE ANSWER SHEET. DO NOT PUT ANY MARKS IN THIS QUESTION BOOKLET.
- C. IMPORTANT DIRECTIONS FOR MARKING ANSWERS:
  1. Use only a number 2 pencil for completing this survey.
  2. DO NOT use ink or ballpoint pens.
  3. Make heavy black marks that fill the response circle completely.
  4. Erase completely any answer you wish to change.
  5. Make no stray marks on the answer sheet.
  6. Please look at the Examples of right and wrong markings on side 1 (upper left) of the ANSWER SHEET.

You are now going to start answering questions in the main part of the survey. Answers for these questions are marked in the numbered rows on the Answer Sheet. Be sure to mark the letter best fitting your opinion in the correctly numbered row.

The first question is:

1. Based on what you know now, how satisfied do you think you will be with Army life? Please use the scale below to answer this question. For example, people who expect to be Very Satisfied with Army life would mark "A". People who think they will be Very Dissatisfied with the Army would mark "G". Other people may have opinions somewhere between "A" and "G".

VERY SATISFIED

VERY DISSATISFIED

Mark the letter which shows how satisfied you expect you will be. Row 1 on the Answer Sheet.
